Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Objections

Claim 20 is objected to because of the following informalities:

According to pages 80 and 101 of the specification, the light from light compensating means does not reach the scanning means only when the film is free of scratches. According to page 102, the light from light compensating means does reach the scanning means when the light is refracted by the scratched area. The recitation in claim 20 seems to indicate that the light does not reach the scanning means regardless of the condition of the film.

Also, regarding Claim 20, "random direction" is unclear since the light compensating means according to the written description is located on the opposite side of the film from the scanning means directed towards the film, not at a random direction.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 19 is rejected under 35 U.S.C. 102(e) as being anticipated by Stavely et al.

(Stavely) (5,969,372).

Stavely discloses a film scanner (Fig. 3) comprising a first light source (302), scanning means (310) which register an image corresponding to an original image (300), and light

compensating means (304) which compensates insufficient light quantity due to disturbance of a light by an irregularity in the surface of the film using the disturbance of the light path caused by the irregularity (col. 4, line 56 – col. 5, line 65), the light compensating means producing light which differs from the light produced by the first light source (col. 5, lines 6-8) and which is projected onto the surface of the film (col. 5, lines 6-23).

Allowable Subject Matter

Claims 39-43 are allowed.

Claims 21-28 and 33-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 20 would be allowable if rewritten to overcome the objection set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Remarks

In response to the amendment, Claim 19 is rejected based on the teachings of Stavely et al. reference. Since the recitation regarding “random direction” of projection by the light compensating means is not clear, the recitation is interpreted as a second direction different from the direction of the first light source, which Stavely et al. discloses (302, 304).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
